

## STEMCO CREWSON 1.30" WELDED CLEVIS BRAKE ADJUSTERS

**To: All Distributors of STEMCO Brake Products**

STEMCO is pleased to announce the availability of new STEMCO Crewson brake adjusters with 1.30" pin spacing, typical of welded clevis applications used on International, Freightliner, Mack and Volvo trucks. Part numbers are available in both Auto-Check and Non-Auto-Check versions.

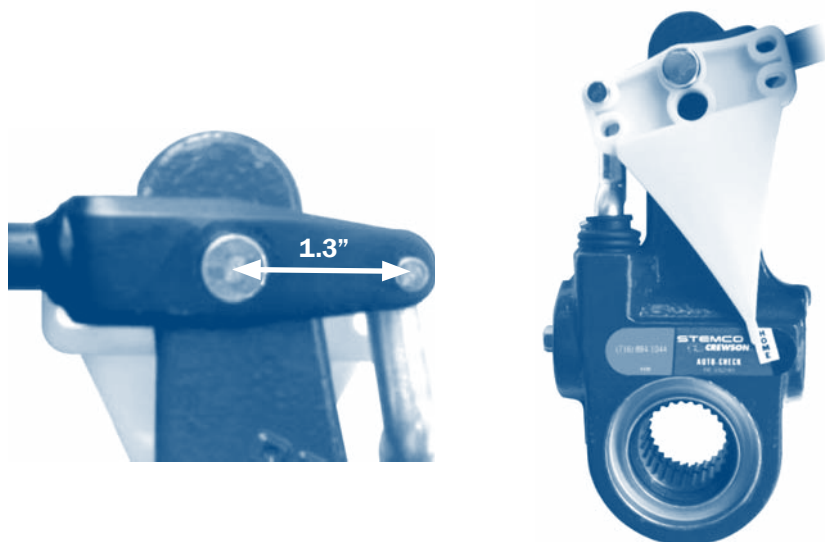

For easy identification, the 1.30" welded clevis brake adjusters have a silver lift rod instead of black. Also, the pin spacing can be measured for confirmation versus standard 1.38" brake adjusters.

The proper mounting angle has been designed into the product, so an installation gauge is not necessary. The 1.30" welded clevis brake adjusters are not boxed with clevis or installation gauges.
